Wave goodbye to wireless security problems.

What's making you insecure at work? Your wireless network? No problem. NETGEAR® knows how to send security problems packing, with powerful, affordable business class firewalls.

Take the unique FVM318. This broadband 802.11b wireless VPN firewall blocks the gaps in WEP encryption with the first implementation in its category of the government-approved Advanced Encryption Standard (AES). The FVM318 is a complete solution, initiating up to 70 WAN-based IPSec VPN tunnels and up to 32 IPSec-based WLAN VPN (3DES or AES) tunnels. No additional hardware or software is needed for operation as with competitive solutions.

The FVM318 is also painless to set up, thanks to NETGEAR's Smart Wizard, Web-based configuration screen and Install Assistant. And it's backed by a three-year warranty and 24/7 technical support. All of which should give you a wave of relief regarding wireless.
